

## ENVIRONMENTAL POLICY STATEMENT December 2021

The Westside group of companies is committed to achieving a high level of environmental care while undertaking its business and aims for continuous improvement of issues relating to environmental management.

Management is committed to demonstrate leadership with respect to the environmental management system and takes accountability for the effectiveness of system.

Westside is committed to establish environmental objectives at relevant functions, levels and processes needed for the environmental management system. All environmental objectives shall be appropriate, measurable and will be continuously reviewed and updated to ensure environmental compliance.

The environmental aspect of our Business Management System is designed to ensure that we will commit to the protection of the environment, including prevention of pollutions and other relevant environmental aspects, and to fulfil all applicable statutory and regulatory requirements.

The Business Management System that Westside has established is based on the standard ISO14001:2015. The methods employed are to be kept under continual review and improved whenever and wherever possible.

All employees are expected to embrace and support Westside's environmental principles, and to actively pursue the requirements of the Business Management System so that we can meet our environmental obligations.
